

A MODERN ALTERNATIVE
to three-strip flooring

VISTA is a modern take on traditional three-strip parquet flooring. Made from 100% real wood and enhanced with patented technology for extra durability, it's well suited for busy homes, apartments and high-traffic areas.

By making efficient use of each log, VISTA achieves a dynamic look that highlights the wood's natural variation, finished in an elegant matt lacquer.

Developed with patented Woodura® technology, this floor offers enhanced resistance to impact and water, making it ideal for daily life. Made from FSC®-certified oak and carrying the Nordic Swan Ecolabel, VISTA is a more resource-efficient choice that helps preserve more trees. The leakproof 5G Dry® locking system also ensures an easy installation while preventing water from reaching the subfloor.

Vista has some natural colour variations and visible knots.
