

Transporting24

Transportation Management System

TMS

Transporting24 is an all-encompassing software platform designed for Transportation Management Systems (TMS) that optimizes various distribution models — including partner networks and owned fleets.

Customized for third-party logistics providers, freight forwarders, carriers, wholesalers, and retailers.

Utilizing Transporting24 allows you to fully digitize your distribution process, effectively control quality and costs, and enhance the experience for both customers and recipients.

Key functions of Transporting24 ...

Management of orders for delivery, recycling, returns of goods, and services at customer locations.

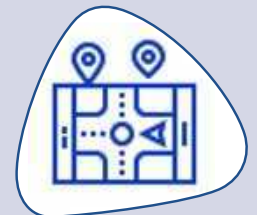

Centralized management of fleets, multiple carriers, and couriers for each store, hub, and central warehouse.

Route orders to the appropriate partner using several criteria, including weight, volume, zip code, delivery time, and cost.

Create and monitor real-time routes for your fleet vehicles.

Monitor the status of delivery and pickup orders in real time.

Remove loading errors and monitor returns from cancellations and pickups at the order or box level.

Promptly responding to questions and requests from customers or colleagues in other departments.

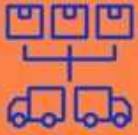

Regularly evaluate the quality of distribution and ensure compliance with key performance indicators (KPIs) for each partner, fleet, and overall performance.

Transporting24

Management of Cross-Docking Operations. Organize sorting areas for in-transit items, damaged goods, returns, and more.

Procedures for sorting and grouping multiple orders upon arrival for distribution.

Monitor the expected and actual costs for each fleet, carrier, and courier to validate their charges effectively.

Management of cash on delivery, recording amounts in the driver application, and accepting various payment methods.

Digitizing and automatically categorizing returned signed documents (Proof of Delivery).

Management of claims related to the incidents of depositors, consignors, and recipients, along with reports on resolution times.

Consignors and Customers Portal – Recipient Track and Trace Functionality.

Enhance recipients' experience with automatic notifications about their order status and the ability to track its progress via Track & Trace.

Large commercial companies, retailers, third-party logistics providers, and carriers trust **Transporting24** for their daily transportation operations.
