

June 2026

TO: Honourable Minister / Director General
Caribbean Government, Regional Authority or Development Institution

SUBJECT: Digital World Networks — Caribbean Digital Infrastructure Programme (15 Programmes Enclosed)

Dear Distinguished Partner,

It is my privilege to introduce the **Digital World Networks (DWN) Caribbean Digital Infrastructure Programme** — a curated portfolio of fifteen world-class technology partnerships made available specifically to Caribbean governments, regional development authorities, utilities, and qualified enterprises.

Clarke Gittens Farmer (CGF Law) is pleased to serve as **Caribbean Legal Representative and Regional Distribution Partner** for Digital World Networks, presenting these programmes to regional stakeholders through our LexMundi and World Services Group networks. We have reviewed these partnerships and are confident they address the region's most pressing infrastructure, energy, water, and digital governance priorities.

Digital World Networks is a **Global Digital Infrastructure Platform** connecting individuals, businesses, and governments with trusted digital solutions across **188 countries, 642 cities, and 351 specialised industry networks**. The DWN Caribbean Programme is headquartered in Coral Gables, Florida, with active Caribbean representatives in Barbados, Toronto, and the Eastern Caribbean.

The fifteen programmes in this package span the full spectrum of priority infrastructure for Caribbean nations today: digital water management, petroleum storage and energy security, smart communities, government digital transformation, physical security, location intelligence, cybersecurity, clean energy, intelligent transportation, agribusiness technology, carbon credits, agricultural digitalisation, digital tax administration, digital identity, and institutional currency exchange. Each programme is led by a globally recognised partner with proven government deployment experience.

Each enclosed brochure contains full programme details, solutions summaries, partnership benefits, and a readiness questionnaire. We invite you to review the programmes relevant to your institution and complete the questionnaire for any programme of interest. There is **no cost and no obligation** at any stage.

The complete programme summary is on the following page. We look forward to exploring how Digital World Networks can serve your government, institution, or enterprise across the Caribbean region.

Warm regards,

Sabrina Maynard

COMPLETE PROGRAMME SUMMARY — 15 INITIATIVES

The table below summarises all fifteen programmes enclosed in this package. Blue folder = Currency Solutions financial services programme. Red folder = 14 technology programmes across digital infrastructure.

F	PARTNER	PROGRAMME	KEY BENEFIT
B	Currency Solutions (London)	FX, Gold & Digital Asset Programme	Institutional FX up to \$20M per transaction per business day. FCA-authorised London partner. Gold & crypto exchange.
R	Xylem	Caribbean Digital Water Programme	Smart water management, NRW reduction, desalination, AMI metering & hurricane-resilient infrastructure.
R	Crowley	Caribbean Petroleum Storage Programme	Government strategic petroleum reserves, digital tank farm management & hurricane-hardened fuel logistics.
R	Honeywell	Smart Communities & Urban Infrastructure	Unified smart city command platforms integrating government services, transport, energy & citizen engagement.
R	Granicus	Government Digital Transformation	Digital citizen engagement, permitting, licensing & eGovernment platforms — 7,000+ government clients.
R	Genetec	Physical Security Solutions	Unified video surveillance, access control, LPR & AI-powered situational awareness for ports & government facilities.
R	Esri	GIS & Location Intelligence	National mapping, spatial analytics & disaster preparedness — trusted by 75% of the world's largest governments.
R	Cisco Duo	Zero Trust Identity & Cybersecurity	Multi-factor authentication, zero trust network access & identity security for government systems and citizen data.
R	Ignite Energy Access	Caribbean Clean Energy Programme	Distributed solar, mini-grids & commercial renewable energy reducing reliance on imported fossil fuels.
R	Miovision	Intelligent Transportation	AI-powered traffic intelligence, signal optimisation & smart mobility for Caribbean cities and tourist corridors.
R	FarmERP	Caribbean Agribusiness ERP Programme	AI cloud ERP for plantation management, contract farming, export compliance & supply chain. 30+ countries.
R	Climate Impact Partners	Carbon Credits Programme	Transform Caribbean forests, mangroves & climate initiatives into verified carbon credits sold to corporate buyers.
R	AGRIVI	Agricultural Digitalisation Programme	Precision farming, crop monitoring, supply chain traceability & food security planning for Caribbean islands.
R	TaxOnline	Digital Tax Administration	Digital tax systems for revenue authorities — automated filing, e-invoicing & real-time compliance reporting.
R	Ascertia	Digital Trust & Identity	Digital signatures, identity verification & document trust infrastructure for legally-binding digital transactions.

A complete **Partner Websites Reference Sheet** is included in the package listing official URLs for all fifteen partners for independent due diligence. Please complete the questionnaire in each brochure for any programme of interest and return to Patrick Glemaud — DWN will handle all introductions.
